AirBeam3 Air Quality Instrument

Check the air quality of your home, yard, or office with the AirBeam! The AirBeam measures harmful microscopic air particles (particulate matter), humidity, and temperature.

How does it work? The AirBeam measures particulate matter by drawing in air and measuring the concentration and size of particles using a light scattering method, then communicates these measurements to the AirCasting App where your measurements are mapped and graphed in real-time on your smartphone.

It also includes an onboard GPS, clock, and SD card so it can operate in standalone mode and log data without being connected to a smartphone, Wi-Fi, or cellular network.

Technology Equipment ~ Located behind the main level circulation desk.

Blood Pressure Home Monitor

Heart health is important, and this blood pressure monitor can provide helpful data for your personal heart health journey. The kit includes information on how to use the cuff, how to read the resulting numbers, and tips for managing blood pressure.

Provided by the American Heart Association as part of their Libraries with Heart initiative.

T-Mobile
T10 Wi-
Hotspot

Franklin
Fi

Technology Equipment ~ Located behind the main level circulation desk.

Stay connected at high speeds wherever you go with the T-Mobile Franklin T10 mobile hotspot device! Browse the internet, stay updated on social media, and shop online using your own private Wi-Fi network. Enjoy reliable high-speed internet so you can get things done at home, on-the-go, in the car, or at the office. Can connect up to 15 devices at a time.

A3 LED Light Pad

Technology Equipment ~ Located behind the main level circulation desk.

This light pad is ideal for stenciling, 2D animation, calligraphy, embossing, scrapbooking, tattoo transferring, sketching and drawing, streaming, sewing projects, quilting, and more! It's also large enough for diamond painting and weeding vinyl. A built-in, foldable stand with six adjustable levels is hidden on the back. It also features five hours of battery life and six brightness levels in white, warm yellow, or warm white mode.

RM RICOMAX Professional

Metal Detector

Technology Equipment ~ Located behind the main level circulation desk.

Go treasure hunting in real life! The RM RICOMAX can detect metals including iron, aluminum, gold, bronze, silver, and their articles in ALL METAL Mode. DISC & NOTCH Modes allow you to ignore unwanted metal, or you can pinpoint the location of a target accurately in P/P Mode. It is also safe to use in water! The 10" search coil is shielded with plastic. It can detect up to 8.7 inches and even deeper in pinpoint function mode, depending on soil type. It also features an audio jack to connect to a headset when searching in noisy settings.

VIDBOX Video Conversion for PC With VCR

Videotapes can deteriorate over time. Your old videos will develop color bleed, white specks, and other distortions. Don't risk this happening to your home video collection! VIDBOX Video Conversion for PC will save and secure your precious memories from VHS, Betamax, 8mm and camcorder tapes to digital formats and DVD. Step-by-step pictorial instructions guide you through the process. You can also record audio from your cassettes and LP records to create WMA files or audio CDs.

Requirements: Windows 10, 8, or 7; USB 2.0 or 3.0 port; Intel Core 2 Duo or higher; 1GB of RAM; minimum 15GB hard disk space; camcorder or VCR for tape conversion. Converts to DVD, MEP-2 or MP4. Conversion is in real time.
